## Skills

**Front-end:** *HTML, CSS, JavaScript, Bootstrap, React.js, Node.js, JSON, JQuery,*

**Mobile:** *Swift, SwiftUI, Storyboard*

**Database:** *Realm*

**Non-technical:** *Teamwork, Mentoring, Teaching, Problem-Solving, Prioritising*

## Personal Summary

---

An avid learner and problem solver, I have worked hard over the last year and a half to teach myself the Swift programming language and now I'm enrolled on an intensive bootcamp to learn front-end web development. I have been interested in changing careers for a while and I am so excited that I finally have the opportunity to follow this passion.

The Front-End bootcamp I am enrolled in finishes on the 24th March and the syllabus includes the fundamentals of HTML, CSS and JavaScript as well as frameworks such as React.js, Node.js. We will also cover both test-driven and behaviour-driven development and as well as weekly challenges I will have completed two major projects by the end of March.

## Projects

---

**THRYV** | [Repo](#) | [Deployed](#)

Our first group project, a mindfulness app to offer a moment of reflection and assign a daily critical task

*Skills: HTML, CSS, Bootstrap, JS, jQuery*

**Book Tracker** | [Repo](#)

After my friends and I formed a book club I designed and published to the App Store an app to search for books and a brief description using the Google Books API, add them to your 'library' and track your progress.

*Skills: Swift, SwiftUI, SwiftyJSON, Realm*

**Weather** | [Repo](#) | [Deployed](#)

A simple weather dashboard to search and save for locations around the world.

*Skills: HTML, CSS, JavaScript, jQuery, REST API*

## Education

---

Front-End Web Development, *EdX*

March 2023

Children's Nursing, *LSBU, London*

September 2019
